EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Kelly Merkel on October 28, 2004.

The application has been amended as follows:

In the abstract,

Line 1, "the present invention provides a" has been deleted.

Line 1, before "dual-phase", --A-- has been inserted.

Line 1, "that" has been deleted.

2. The following is an examiner's statement of reasons for allowance: none of the prior art of record alone or in combination teaches a dual-phase flush cycle urinal comprising a fixture having a rear wall, the rear wall having a mounting surface and a urinal surface, an elongate channel defined between the mounting surface and the urinal surface and along a longitudinal extent of the rear wall, coextensive sidewalls protruding normally outwardly from the urinal surface, each sidewall having a generally planar inner surface in parallel alignment with an inner surface of a sidewall spaced therefrom, the urinal surface and the sidewall inner surfaces defining an ingress for an internally defined containment area in which at least one atmospheric vacuum breaker (AVB) and at least one valve means are disposed, the valve means being in electrical

communication with a sensor and having a first fluid discharge port in fluid communication with the bowl portion and a second fluid discharge port, wherein, upon detection of the user, the sensor transmits a first signal to the valve means to initiate a first water exchange phase of the flush cycle during which the valve means discharges water through the first fluid discharge port along the elongate channel to remove waste from a bowl portion, and the sensor, after a predetermined delay, transmits a subsequent second signal to the valve means to initiate a wall-scouring phase of the flush cycle during which the valve means discharges water from said second fluid discharge port along the urinal surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

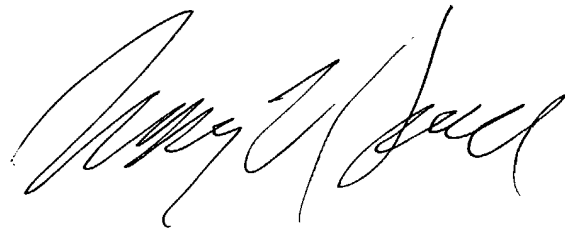

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Huyen Le whose telephone number is 703-306-5504. The examiner can normally be reached on Monday-Friday from 9:00 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Huson can be reached on 703-308-2580. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
